SUMMARY

Frontend Developer and UI/UX Designer pursuing a Bachelor of Science in Information Technology, passionate about crafting seamless digital experiences from concept to implementation. Experienced in designing intuitive user interfaces, creating responsive web applications, and bridging the gap between design and development to deliver accessible, user-centered products. Backed by hands-on industry experience through professional internships, along with a portfolio of academic projects, hackathons, and UI/UX design competitions.

EDUCATION

Bachelor of Science in Information Technology 2023 – Present
University of Cebu - Lapu-Lapu and Mandaue

EXPERIENCES

myDoktora 10/2026 – Present
UI/UX Design Intern
New York, USA | PH-based Remote
- Collaborate with a senior UI/UX designer as part of Genuinexs' Philippines-based design team, contributing to the user experience and visual design of the myDoktora platform.
- Translate project requirements and design feedback into practical interface improvements.
- Work closely with developers to ensure accurate implementation of design specifications.
- Contribute to usability improvements by identifying UI/UX issues

Freelance Digital Artist 01/2021 – 04/2023
Self-Employed
- Designed custom digital artwork for commissioned local and international clients, translating concepts and references into high-quality, visually compelling illustrations.
- Collaborated remotely with an international client, maintaining clear communication, incorporating feedback, and delivering projects on schedule.
- Managed multiple commissioned projects simultaneously by coordinating timelines, revisions, and client expectations while maintaining high-quality deliverables.

TECHNICAL SKILLS

UI/UX: Figma, Wireframing, Prototyping, User Interface (UI) Design
Frontend: React.js, JavaScript, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Laravel, PHP
Database: Supabase, MySQL, SQL Server Management Studio (SSMS)
Programming Languages: Java, C, C#
Version Control: Git, GitHub

PROJECTS

RECAP: A Mobile-Responsive Web Application for Event Management and Automated Scoring 2026
Frontend Developer and UI/UX Designer
- Led the UI/UX design and frontend development of a mobile-responsive Quiz Bowl management system using React.
- Built responsive, reusable, and intuitive user interfaces for event management, participant registration, quiz administration, and score monitoring.
- The system automates answer recognition and scoring through Computer Vision, OCR, and CNN technologies, reducing manual score validation.
- Features real-time participant monitoring, automated score updates, and live leaderboard tracking to streamline Quiz Bowl events.

Tech Stack: Computer Vision, OCR, CNN, React, Supabase

Chew: AI-Powered Smart Meal Planner 2026
UI/UX Designer and Project Coordinator
- Conducted an end-to-end UX case study for an AI-powered meal planner that personalizes recipe recommendations based on users' dietary needs, preferences, and meal planning goals.
- Defined user personas, information architecture, and end-to-end user flows to simplify meal planning and recipe discovery.
- Designed wireframes, high-fidelity interfaces, and interactive Figma prototypes, focusing on presenting personalized recommendations in a clear and user-friendly way.
- Explored UX strategies for making AI-driven meal suggestions more relevant, understandable, and aligned with individual dietary preferences.

Platform: Figma

Zura: Gamified Sustainable Waste Management 2026
UI/UX Designer and Project Coordinator
- Developed a UX case study for a gamified recycling platform designed to encourage sustainable waste disposal through points and rewards.
- Explored user motivations and barriers to recycling through UX research, identifying opportunities to make sustainable behavior more engaging and accessible.
- Designed user journeys and interactive Figma prototypes for recycling activity tracking, point accumulation, and reward redemption.
- Applied gamification principles to the user experience to encourage continued participation and make recycling progress more visible and rewarding.

Platform: Figma

Chishore 2026
Front-End Development Project
Developed a responsive yacht booking website with a modern user interface, enabling users to explore luxury yachts, browse destinations, and book charter experiences through an intuitive and engaging frontend experience.
Tech Stack: HTML, Tailwind CSS, React, Javascript, EmailJS

CERTIFICATIONS

- Test of Practical Competency in IT (TOPCIT) Level 3 Passer
- IBM SkillsBuild: User Experience Design Fundamentals
- Cisco CCNA: Switching, Routing, and Wireless Essentials
- IBM SkillsBuild: Data Fundamentals
- IBM SkillsBuild: Cloud Computing Fundamentals
